Hello, I'm excited for this school year to begin and the chance to work with these 3rd- 5th graders in two of my favorite subject areas, Science and Art. We have planned lots of fun interactive units to learn about the world around us through hands on activities.

I just recently retired from 33 years of teaching grades PK-4th grade. I graduated from the University of Oklahoma with both my BS and Master's degrees in education. I yell loudly for my Sooners but respect the Cowboys as my husband is a graduate from there. I have a daughter that is married and working in Dallas. Oh!! And one very spoiled rotten black cat.
